Safe and Secure Solutions

One of the most efficient ways to live with confidence in our homes is the ability to lock the door. It not only helps us feel that we are protected but it allows us to comfortably leave the house and move about the community.

It's no secret that locksmith calls can be an unforeseen expense and may be delayed causing an unsafe condition in the residence.

With a grant from BC Division of Community Development, *hip* can work with eligible Bergen County residents with disabilities and seniors to avoid security problems.

We can:

- **Cover the cost of a locksmith visit to repair a lock.**
- **Provide a combination lock box to keep your key secure for trusted friends or family members.**
- **Purchase a lock to replace old or broken equipment.**
